INFORMATION

Roberts® Pro Mini Pry Bar is the perfect tool to remove moulding. A must-have tool for floor installers, its curved design provides the precise angles and optimal leverage you need to effectively pull base moulding and tack strip, especially in places where a large pry bar won't work. Manufactured from high carbon forged steel with bright nickel plating, its upgraded deep bevel nail slots ensure easy, quick removal. This versatile tool is built to last – yet small enough to fit in your toolbox.
