FINISHES

PRODUCT DESCRIPTION

The 8mm Angle Edge is a self adhesive doorbar designed for wood and vinyl flooring 7mm thick, providing a neat and protective finish.

These bars are adhered directly to the flooring for a fast and easy installation process.

DIMENSIONS

This doorbar is 32mm wide, 8mm tall and comes in 2.7m lengths. The entire doorbar is visible once installed.

MAINTENANCE

Roberts Doorbars are easy to maintain, requiring no special materials to clean. Aluminium can be corroded by alkaline substances so alkaline cleaner materials should be avoided and quickly removed if contact is made. Cement and cement-based substances become alkaline in contact with water. It is important to correctly seal the area surrounding the door bar to prevent water pooling.

The aluminium finishes will oxidise over time. A polishing agent can be used to remove it.

The gold finish is susceptible to scratching and may be damaged by mortar, tile adhesive and grout. It can only be repaired by reapplying the anodising and aluminium will require testing to see if it can sustain the process. It is best to remove setting material immediately with a non-abrasive cleaner.

INSTALLATION

1. Measure the length of the vinyl flooring edge/doorway and cut the profile to match.
2. Fit the flooring as directed.
3. Peel the backing from the adhesive layer and press it firmly against the flooring.
